Jl. Simpang Suropati II/4 Losari, Singosari, Kabupaten Malang

Informatics Engineering student and Certified Associate Data Scientist specializing in full-stack development and data engineering. Experienced in building scalable web and mobile solutions, including AI-powered platforms and integrated attendance systems. Proficient in Python, SQL, and ETL workflows to develop data-driven systems that optimize business efficiency.

EDUCATION

State Polytechnic of Malang

Bachelor of Applied Science, Informatics Engineering
Cumulative GPA: 3.57/4.0

Malang City
Aug 2023 – Present

PROFESSIONAL EXPERIENCE

Google Developer Groups on Campus Maliki

Mobile Developer | Bootcamp

Malang City
Sep 2025

- Completed a comprehensive Flutter bootcamp covering local and cloud environment setup, Dart fundamentals, and advanced features—including state management and API integration—culminating in the development and deployment of the "Talent Hub" project.

PT Inspirasi Mandiri Nusantara

Web Developer | Internship

Malang City
Sep 2025 - Jan 2026

- Designed, developed, and maintained high-performance Progressive Web Apps (PWA) with offline-first capabilities, API integration (REST/GraphQL), and optimized, responsive UI/UX.
- Collaborated with UI/UX, backend, and product management teams to develop features and authored comprehensive technical documentation for application architecture and system maintenance.

PT Multi Spunindo Jaya Tbk

IT Programmer | Internship

Sidoarjo Regency
Jan 2026 - Present

- Contributed to the development and maintenance of Laravel-based applications, covering database design, coding, and debugging processes.
- Conducted application testing (QA) prior to implementation and prepared regular project progress reports to ensure system quality.
- Analyzed system requirements and collaborated with cross-departmental teams to support internal corporate project development.

PROJECTS

Sibeta

Project manager | UI/UX | Front End Developer

- Developed a digital solution to streamline and automate the final project clearance process, enabling students to upload and track documents in real-time.
- Provided interactive dashboards for department and central admins to efficiently verify, notify, and archive records through a secure login system.

Internify

Full Stack Developer

- Developed a web-based platform utilizing the Grey Relational Analysis (GRA) method to match students with internship placements based on their interests and academic profiles.
- Features comprehensive tools for application, real-time monitoring, and automated reporting for students, supervisors, and administrators.

Talent Hub

Mobile Developer

- Developed a digital career solution that enhances recruitment efficiency through an intuitive interface and tailored recommendations to speed up the job search process for users.
- Supports companies in identifying and acquiring top-tier candidates accurately and on time by aligning market needs with operational efficiency.

Marketplace Jawara

Mobile Developer | Machine Learning | Computer Vision

- Developed a Web and Mobile ecosystem (FastAPI & MySQL) to modernize data, finance, and administrative management for neighborhood governance (RT/RW).
- Integrated a Machine Learning and Computer Vision powered smart camera feature to automatically validate vegetable product quality within the local community marketplace.

Pintara Kids

Web Developer

- Developed a Progressive Web App (PWA) educational platform featuring interactive stories, cognitive worksheets, and flashcards to support child development.
- Created a safe and accessible digital learning space that enhances children's education while facilitating active parental involvement.

CERTIFICATION

Digital Talent Scholarship

- Introduction to Artificial Intelligence (Fresh Graduate Academy)
- Associate Data Scientist (Digital Talent Academy)
- Intermediate Junior Web Developer (Vocational School Graduate Academy)

IBM

- Data Classification and Summarization Using IBM Granite
